

Submitter: Brian Hudspeth
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

Committee Members,

Let's STOP pandering to the extreme leftists in our society. By even allowing legislation like this to be heard is an incentive for them. Currently the US Fish and Wildlife Service is the agency in charge of stopping the import and export of animals and animal parts into the US. The list of species that cannot be imported into the US is rather extensive, I wonder if you all have are even aware of it? This is not a state issue, I urge you all to ignore these rediculas requests and spend your time more productively working on the real issues that face Oregoinans like homelessness and mental health.

I doubt you even bothered to look at agenda items brought by the extreme right, so why bother looking at items from the extreme left. This legislation will do nothing but stop good and decent business and hobbies, like fly fishing!
