

Submitter: Levi Holiday
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB348

Limiting the citizens rights to use or own, or bear such arms is completely unconstitutional and has proven over and over to fail at succeeding in prevention of crime. We need to look at the underlying causes of the criminal activity and repair the root of the problem instead of infringing upon the rights that are given to us by our maker. And all lawmakers including the judicial department needs to follow the oath they took to protect the Constitution at all costs. Limiting the citizens in the arms that they could bear is only going to hurt more people than it will help. See about correcting poverty and improving people's lives so they will not choose to do harm to others, no matter what tool they use. That's a simple study, those that hurt the most cause the most harm.
