

Submitter: Paul Furnari

On Behalf Of: Supporters of an idea whose time has come

Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water

Measure: HB3086

Since the ODFW Commission is charged with protecting fish and wildlife, it makes perfect sense that the commissioners should represent natural geographic regions of the state (like river basins) instead of man-made political subdivisions that have no unique bearing on the natural world (witness the petty gerrymandering of congressional districts by our current governor). Make the change!
