

Submitter: Jane Herb

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB409

I support SB409. As a public entity supported by tax-payers, everyone has the right to see the education materials being used with our students. Nothing should be going on that would be cause for concern of shedding a light into what is being taught at our public schools. Viewing of these materials needs to be as barrier-free as possible so as not to disenfranchise anyone who may have mobility issues or other circumstances, such as working hours or lack of transportation, that would make it difficult to view materials in person. Please vote yes on SB409.

Thank you.
