

Submitter: Wallace Rogers

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB527

Oppose. Did you forget that during the Vietnam War, the voting age was reduced from 21 to 18, because our youth were given a gun and drafted, against their will, into the Vietnam War at 18 years old and under President Johnson's (D) administration.

18 is still the age that has been determined to be appropriate age of judgement. We have ridiculous proposals to make 16 year olds, and not their mature parents, in charge of life changing chemical castration and this SAME legislature proposes increasing the gun responsibility age to 21 while they can learn to kill in the military at 18. It doesnt make sense. If you want to have a REAL impact, drop this and ban first person shooter video games here and nationally. Hours and days playing those first person games are normalizing criminal behavior in an undeveloped mind.
