

Submitter: Liz Batterson  
On Behalf Of:  
Committee: Senate Committee On Judiciary  
Measure: SB348

I want to say SHAME ON ALL OF YOU that are behind this bill. measure 114 is being constitutionally challenged as many other challenged decisions against gun restriction this year weigh in, Oregon's Measure 114 is Unconstitutional. Seeing it flounder and still on hold you decide to change the ENTIRE bill and stuff and gut it into Measure 114 on STEROIDS. You have not learned anything, nor have you been listening to the fact that 60% of your state wants to CEEDE from Oregon due to measures identical to this one; overarching, unconstitutional, and blatant socialist/Marxist/communist ideology.

It's time to do your job. Stop worrying about guns and start focusing on COMMON SENSE measures such as gutting and reforming the mental health system. Changing laws to actually prosecute violent offenders, repeal the failure that is Measure 110 which has made Oregon a laughing stock of the world. Deal with homeless by becoming tough on sanitation, crime, drugs and make a fund for bus tickets to send them back to where they came from. Anyone with half a brain can see they came because of measure 110 and stay because our governor wants to pay them to stay. Drug Rehab and mental health hospitals need to be a priority. Services need to be around successful reintegration to the social world, not here's more medications, good luck.

Do what you were elected to do. Instead of violating our liberties as law abiding citizens, get tough on those who are not. Remove laws that are proven ineffective and get back to what WE Oregonians need. And Cap and Trade needs to be ABOLISHED as the people said NO. Governor Brown had no right to slide it in under Emergency Authorization. The Central, Eastern, and Southern Oregonians, we prove the carbon offset for the Western Valleys total emissions and carbon. So stop regulating US and start regulating the Western side. Also talk to a few geologists while you are at it. The earth has changed temperature millions of times in its history. Panic over a natural cycle is laughable.
