

Submitter: Marshall Sanders
On Behalf Of:
Committee: Senate Committee On Health Care
Measure: SB408

SB 408 is an unconstitutional abomination. No one, no government has the authority to take away God given freedom to decide and choose what is best for them. OHA and the Governor performed abysmally during the Corona incident, sending our society into a tailspin we are now decimated by. Having OHA become a Politburo of Medical totalitarianism to protect the vested interests of BigPharma and their sales, and BigMed and their 40 years of lobbied and documented downsizing of Hospital capacities to overclock profits, is NOT the job of the Legislature. The Legislature's job is to provide for the social needs of it's residents, voters and taxpayers. Our social needs are freedom of choice, as clearly delineated in the Oregon Constitution, and access to the Health Care we choose to use. Limiting Medical Practitioners of all kinds THEIR freedom of choice, freedom of speech, and access to unlimited new and old technologies and remedies is an insane tyrannical coup d'etat of Health Practices. We saw this during the LOCKDOWN incarceration of Oregonians for 3 years and we want NO MORE of this TOTALITARIANISM.

And we are not Republicans. We are not Democrats. I am a Green Party voter. I am for social democracy. What we are seeing in this 21st C is a transformation to a techno totalitarian country and Oregon has a FAKE Liberal Democratic Party that is leading the way. This is disgusting!

Do your Legislative jobs and start strictly obeying YOUR ONLY MANDATE, to support and protect our rights described very clearly in the Constitution. When all the harm done by LOCKDOWN and vaccines becomes available why should not elected and appointed government officials be made liable?

And we also ask what kind of government action is it that makes non-liability clauses for businesses like BigPharma whose products are untested, unreliable, damaging and even kill? And what Oregon government officials made deals with HMO's since 1980 to downsize Oregon's per capita hospital bed capacities from a US average of 4.5 beds/1000 in 1980 to the US lowest in 2021 of 1.7/1000? This was the cause of the OHA's "hospital capacity crisis" during the LOCKDOWN. Manufactured by OHA and whatever government officials went along with BigMed downsizing demands to increase bottom lines. You folks need to start talking to us and not corporate lobbyists.

SINCERELY,

Marshall Sanders
