

Submitter: rick anderson
On Behalf Of: Fly Fishing Specialties
Committee: House Committee On Judiciary
Measure: HB3390

To whom it may concern,

This proposed bill language does not provide enough clarity on "fur products" as they relate to use or sale for construction of fishing lures and artificial flies. As a business owner who significantly relies on selling fur related products, solely for tying fishing flies, any restrictions associated with importing "fur products" from Oregon would dramatically affect my business and livelihood. I would request the author revise the bill language to explicitly exclude materials used in the construction/fabrication of angling lures and artificial flies.

Sincerely,
Rick Anderson
