

Submitter: David Morrison
On Behalf Of: Oregon For Safer Tech
Committee: Senate Committee On Health Care
Measure: SB408

Just found out about this minutes ago. This bill is a terrible bill and indicative of the mindset that has permeated the public and many legislators since the handling of the pandemic. It clearly shows that there is an agenda to control and to create fear in the medical and functional medical community lest they follow the prevailing methods of treatment. As we have seen via the handling of the pandemic and articles slamming masking and forced vaccinations that have been even in mainstream media, we are on the road to tyranny. This is no small matter. Vaccine passports, digital passports, getting the FBI involved in acquiring names of those who refused to take part in a medical experiment. All is about censorship, fear and control. Please do not vote for this bill
