

Submitter: Terry Larimer
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3390

Another animal rights move to stop all hunting. Again why would our government stop the public from hunting or trapping? The one thing that brought people to this state originally, hence the beaver state! This would just be another blunder by our liberal anti American state government in favor of a one world order! Be careful what you wish for , read the Bible, man is to have dominion over the animals. If this measure passes , instead of sportsman willing to pay to hunt, trap and harvest these animals once again the government will have to pay hired trappers and hunters to hunt and trap them just like we are now doing with the cougar and bear. This will be the final straw for me, I will leave this state if this measure passes.
