

Submitter: S N

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB409

I am in support of SB409 - please ask yourself why this would but be made public - key word - 'public' - the #1 purpose of education must be to include parents in the process- WHY would public school curriculum not be made available in a convenient and efficient way? - online? - the parents and caregivers can view it and be another layer of support for the learning cycle. Common sense tells us all that if anything is not made readily available, there will be skepticism and resentment - period. Thank you for your time and I appreciate your use of common sense. Be well!
