

Submitter: Terry Waterman
On Behalf Of: Fair trade farmers
Committee: House Committee On Judiciary
Measure: HB3390

This is a bill aimed at stopping Fair trade, Farming and Freedom.

The jobs lost and national, international, damage this kind of nonsense brings is preposterous.

Farming is the primary production conduit for deer, rabbit, fox, all feathers and almost all furs are harvested through farming not hunting or trapping.

This will effect sheep wool, alpaca wool, rabbit farms for food and fur, chicken production for eggs, meat and feathers.

Beef products across the board.

All tourism associated with hunting of any mammal.

All arts and craft supplies will be effected including but not limited to wool materials for quilting, sewing , knitting, crocheting, clothing and art,

Culturally this effects many customary arts and clothing as well as all Native American First People celebration.

All feathered down products will be next.!

This is a power grab at reducing even more employment and the forcing of beliefs on others.
