

Submitter: Emerald Mansfield ND
On Behalf Of: Emerald Mansfield ND
Committee: Senate Committee On Health Care
Measure: SB408

I oppose SB 408. Every type of medical provider has thier own governing licensing board. Each board is familiar with the education of the type of provider they license and thus appropriately determines the scope of practice. Those boards develop the scope of practice for their providers based on their training and area of expertiese. It is inappropriate and potentially dangerous to the citizens of Oregon for the Oregon Health Authority to have authority to dictate the scope of practice of licensed medical providers. That is the duty of each licensing board and should not be outsourced to another entity.
