

Submitter: Donna Drayer

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3202

Our beautiful state of Oregon needs to reclaim its night skies. The rampant and unrestrained building in Washington County has robbed us of the night's beauty. The light pollution here in Tigard has been an incredible loss to those of us who remember in the nit too distant past what it was like to look at the stars. Our children and grandchildren will not have the amazing human-connecting experience of gazing up in wonder and imagining our place in the Universe. And it is not only humanity that loses. Light pollution, impacts, bird migration and our state's precious wildlife. Please remember who we are as devoted Oregonians and vote to take this small step to protect Oregon's nocturnal beauty.
