

Submitter: Mary Hayden
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: HB3202

Dear Legislators,

Please vote YES on the Night Skies Protection Bill, HB 3202.

This bill helps protect migrating birds and nocturnal animals from the disorienting and deadly effects of over-illumination and promotes human health and safety as well.

It's hard to restore dark night skies once they're gone. Please help put the brakes on unnecessary lighting and save our night skies and wildlife.

Thanks for listening!
