

Submitter: Katt Beckley
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3513

HB 3513 is very vague. There are many questions that arise, especially because of the mention of suicide prevention and this bill. That should be its own topic with a committee purposely formed for prevention of idealization of suicide and mental health. That is hopefully wishing, as I see a mental health decline in both children and adults in my line of work, and would love to see some change.

However, one thing for me holds true about this bill. I do not believe that anyone one should be able to let someone they know hold their firearms for them, especially without a background check, even if they 'believe' the person has had one. This bill is in direct opposition of bills for gun prevention that many constituents and I worked hard to put into place. I feel HB3513 can use some work and rewriting for its true intent, or taken out altogether.

Thank you for your time.
