

Submitter: Chelsea Eichenauer

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB409

I support this spell because the government needs to stay out of our children's education. Parents vote for school board members who support their views. If their views aren't taking into consideration what is the point? If parents can't see what children are learning how can I be involved with helping their children be successful? School is about learning the basics and how to think not what to think.
