

Submitter: Beverly Kent  
On Behalf Of:  
Committee: Joint Committee On Transportation  
Measure: HB3202

IN SUPPORT OF HB 3202

I am a strong supporter of the Night Skies bill, HB 3202, to limit light pollution of our skies.

Light pollution disrupts animal feeding habits, migration, predator/prey relationships, and can effect human health as well. Light pollution can be lessened by requiring outdoor lighting fixtures on state lands to be shielded, no brighter than necessary, and to use lighting with a color temperature no greater than 3,000 Kelvins.

Let's be considerate of others and protect our night skies!
