

Submitter: David Sandage
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: HB3202

IN SUPPORT OF HB 3202

Please support House Bill 3202, which seeks to mitigate the detrimental effects of light pollution on our environment.

Light pollution not only affects those who want to enjoy the beauty of the night skies, but also our sleep cycles and hormones, as well as migrating birds. It is also a win-win scenario. Using only light where it's needed saves electricity which means money savings as well. This bill does NOT infringe on any individual rights and is an important step towards protecting our night sky, our health, and our migrating bird populations.
