

Submitter: Jo Teel

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB409

I believe that not only should the District Curriculum for all grades be posted on the website...I believe it should include a complete list of District School Library books available to students to check out, on site or borrowed for home or classwork. I also feel that it is necessary for those who don't have the internet or access to it, that copies of said lists should be available, at no cost, at the District Office. I feel that rumors and false information is too common, concerning both reading material and curriculum, and that parents and students, as well as those deciding on which area to move to, have access to that information, readily available. The physical and mental health of students in Oregon schools is vital for a strong, intelligent population.
