Water

Measure: HB2765

Regarding HB 2765

I am from Klamath Falls, Oregon, and have seen the effects of the draughts on our community...and the dire situation facing our Wildlife Refuges.

If there is a good reason to create a 20 million dollar pipeline to carry water to the same place it can be delivered by putting it in the river, I don't see it. It seems the pipeline is an unnecessary expenditure for a community that is already struggling financially. I also understand that the addition of this water to the river will help with its health.
