

Submitter: Kurt Liebezeit

On Behalf Of:

Committee: Senate Committee On Health Care

Measure: SB408

I oppose SB 408. I view it as another attempt to centralize authority and control, and that, in my opinion was precisely what led to bad outcomes in the COVID era. The doctors who managed to evade controls and provide early treatment via hydroxychloroquine, ivermectin, and other drugs were demonized in the press and professional circles, yet their outcomes were demonstrably better than the standard of care pushed by the CDC and other medical authorities. At least a quarter of the population knows this, and in our minds the CDC (and by extension, OHA) are thoroughly discredited by their willingness to put pharmaceutical profits before patient welfare.
