

Submitter: Nathaniel Chrowl
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB348
SB 348

I oppose this bill.

I oppose this bill, the next bill, and any bills to follow. I will continue to do so until those who are elected or selected to represent the people do as they are supposed to. This bill, like the bills and measures before it DO NOT support themselves with evidence for their implementation. It astonishes me as to the inability or ignorance of our elected officials and legislators. They will go ahead and create and pass a measure or bill so horribly written it must require a rewrite or follow up measure or bill to Band-Aid it together to an even worse effect. The ridicule and disapproval within this opposition letter will not be sent without a forward guided direction or idea.

If violence control or the reduction thereof is the goal or alleged goal we must look at what changed and why. Why were individuals who grew up in my father's day, capable of having firearms within a walking distance to their vehicles from the schools they attended, and no one got shot up? Why were schools able to teach firearms safety at school in a safe environment without incident? These are the questions that should be posed to the citizens you represent. The only things these bills/measures do is affect the already law abiding citizen and not the criminal or would be criminal.

In conclusion, I again oppose this bill and furthermore demand you and your committee put the trust into the citizens you represent and not take it away like these bills always seem to.
