

Submitter: Ryken Buck
On Behalf Of:
Committee: House Committee On Judiciary
Measure: HB3513

Dear House I strong oppose this Bill going through because the way that guns should be treated is with Respect not disrespect. No matter how many gun laws we are gonna have its not gonna change one thing its just gonna make it a lot harder for the good guys with guns not able to have a gun at all. While growing up as a kid I always Respect the guns when I was old enough I took the hunters safety course my instructor used a example on what kind person should have a gun who shouldn't that is which being said, the bad ones are the people that are mentally unstable, while the good ones have good intentions of having a weapon to protect or feed your Family. In reason I say that is you set loaded weapon on the table tell it to shoot the person its not gonna do anything now when you hold it now the weapon is gonna react when you pull the trigger. Guns aren't the issue its the type of people. Which the if this bill passes the bad guys are still gonna get weapons one way or the other while the good guys are gonna left with nothing and no way to protect our family there for this bill is everything against our second amendment its my right to bear arms my reasons of owning a gun is to hunt for food and to protect my family.
