

Submitter: Mary Ann Buck

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB348

We have just witnessed another school shooting and the deaths of young children and school personnel. What will it take to address this issue with more than thoughts and prayers? At the very minimum, assault weapons need to be taken off the market. I find it incredulous that this country can be so controlled by the gun lobby that it takes precedence over the lives of our children. I also find it unbelievable that this particular bill only addresses ways to study this issue and has until December 31, 2024 to do that!

When will we finally do something that will make a difference?
