

Submitter: Grant Tandy

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3202

As Central Oregonians we pride ourselves on clear, dark skies. Our great state boasts the largest section of pristine dark sky in the lower 48 states. This section of dark sky is located east of Bend towards Pine Mountain Observatory, and extends all the way past the Steens Mountain range. This is a very popular area for star-gazing, bringing people from all over the country and world to experience our natural resources.

On behalf of the Worthy Observatory, I urge Oregon to pass HB 3202, for the protection and safeguard for astronomical observations, guaranteeing the right to observe a sky free from unnecessary artificial polluting sources.

Sincerely,

Grant Tandy
