Committee: House Committee On Agriculture, Land Use, Natural Resources, and
Water

Measure: HJR23

State Representatives

I oppose HJR 23 for two reasons.

Reason number one, and most importantly. The kicker tax has been on the ballot a couple times. Both times it was the Will of the Voters to return all over collected tax dollars to the tax payers. I am pretty certain that was an Oregon constitutional amendment.

Attempting to subvert the voters with legislative action is never acceptable.

If this is one of the climate change related government hoax policies. Forget it!
Many of us are tired of the mantra!

Reason two, just in case attacking voters isn't enough.

As of March 27, Oregon was at 141 percent of our annual snow pack. Additionally 21 to 48 inches of additional snow have been forecast for this weekend. Our snow pack should be more than enough to alleviate or eliminate drought this year. Also keep in mind that we more than likely have two or three months of heavy spring rain on the way.

If you need money for drought projects, make better choices with our tax dollars. you should consider keeping the dams we have and making better utilization of Oregon's water resources, before it gets dumped in the Ocean and is unusable for crops or domestic water supplies.

May I suggest you all Stop wasting tax money, stop creating ideas to add to government spending

The only answer to this proposal is No
Please add my objection to the public record.

Thank you
