

Submitter: Brian Newton

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3202

I wholeheartedly support the movement to recognize light pollution as a major threat to human health and happiness, as well as a threat to wildlife health and habitat. There are technological solutions that enable us to light areas as needed for safety and other reasons, but do so in a way that limits light pollution and its harmful effects. Please support this effort to require lighting that minimizes light pollution.
