

Submitter: Lonny Brady

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB2613

Please don't waste more money and create more restrictions on vehicle emissions. Look at all of the oil, coal, metals mined and dependence on other countries to supply and transport these materials to build batteries. When you see the whole process and the problems with it ,the electric vehicles do not look like such a good idea. Throwing money at it does not make it better.
