RE: Testimony in Support of HB 3124, the Bipartisan Drought Relief and Water Security Package

Dear Chair Helm, Vice-Chair Owens, Vice-Chair Hartman, and Members of the Committee:

I am writing on behalf of Medford Irrigation District to express strong support for House Bill 3124, the Bipartisan Drought Relief and Water Security Package proposed by Representative Helm and Representative Owens. I particularly want to highlight the importance of provisions that provide match funding for irrigation districts to unlock federal dollars for irrigation modernization projects and help districts like ours be more resilient to drought and water scarcity.

Irrigating 12,000 acres in the Rogue Valley of Southern Oregon the Medford Irrigation District has been in operation since 1917 and delivers water to 1400 patrons that grow a variety of high-value crops. Much of the infrastructure that the district relies on is 60-100 years old, inefficient, and increasingly expensive to annually operate and maintain. The modernization projects that the district is pursuing will allow for increased water efficiency, improved water quality, enhanced streamflows, and more reliable water deliveries to patrons.

Oregon has faced several years of severe droughts, including some of the worst on record, and the detrimental impacts are being felt throughout the state, including in our region. Without access to reliable water deliveries, farmers are unable to grow crops and produce the food and fiber that we all rely on. This not only affects our economy but also our food security and increases the urban wildfire risk to our communities.

In order to implement large-scale, multi-benefit projects to modernize irrigation infrastructure and be more resilient to drought, many districts, including ours, have utilized federal programs such as NRCS's Watershed & Flood Prevention Operations or Bureau of Reclamation's WaterSMART for support. These programs play a key role in planning, designing, and implementing projects, but still require some portion of project funding to come from non-federal sources. Our district is committed to modernizing our system, but we require state funding to meet match requirements for implementing identified projects in 2023-2025 and beyond. Bill 3124 contains the match funding districts need to fully utilize and leverage the infrastructure dollars that the federal government has made available.

I urge you to support the important funding components in HB 3124 and ensure that state match funding for irrigation modernization projects remains a part of the final bill. Thank you for your attention to this important matter.

Sincerely,

Jack G. Friend – District Manager
