

Submitter: Emilio Fontana

On Behalf
Of:

Committee: Joint Committee On Ways and Means Subcommittee On General
Government

Measure: HB5035

Technology is so important and still the ability to call and speak to a human, that speaks English clearly that can help and not have to wait three to five days for a reponse will help to keep the economy moving in the right direction. Not everyone is attached to their phone or computer and not everyone only communicates through them. Please consider people wo are not so computer savvy but still are important to the economy and contribute to society. I would rather pay for the ability to talk to a person who can really help than be left out. Make the payment fair and resonable and I will support this bill.
