

Submitter: Darren Maricelli

On Behalf
Of:

Committee: Joint Committee On Ways and Means Subcommittee On General
Government

Measure: HB5035

I would like the secretary of state and the corporations division to increase they're ability to interact with business's in a quick and efficient manner but I would like them to do that with the budget they have and look to reduce the costs to the tax payers. Their staff is bloated and the secretary should be looking at ways to reduce staffing and increase services through automation. That should be the goal of every department of government as we quickly head towards a recession and have less tax dollars to do the things that need to be done. DO MORE WITH LESS! Be prepared for what is coming, not playing catch up after the fact.
