

Submitter: Katrina Doughty

On Behalf Of:

Committee: House Committee On Education

Measure: HB3198

We must enable school districts to teach and support kids in ways that research clearly shows will have the biggest impact on reading by third grade. This bill is a statewide, equity-centered solution that supports students and educators with professional development and coaching for educators, summer programming and tutoring for students, curriculum updates, and culturally responsive books and materials. This is vital for our communities.
