On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: SB545

please support this bill. In a article about what plastic is doing to are eco systems it explains what kind of damage plastic has on our own environment "Plastic pollution can alter habitats and natural processes, reducing ecosystems' ability to adapt to climate change, directly affecting millions of people's livelihoods, food production capabilities and social well-being." if you pass this bill it is one step in the right direction to help our earth. This issue is affecting many people and will have consequences there are alternatives for plastic including glass, platinum silicone, beeswax coated cloth, natural fiber cloth, wood, bamboo, pottery and other ceramics but not enough people have switched to one of these alternatives making it harder to save the earth if we pass this bill we can let people bring there own containers to resturants and help save the earth! thank you for your time.
