

Submitter: Terry Kenny

On Behalf Of:

Committee: Senate Committee on Rules

Measure: SB 1089

I retired after 40 years working in health care and I saw firsthand the complexities and inequalities in our present system. Now, the people of Oregon have passed Measure 111, which makes health care a constitutional right, and it is our opportunity to create a truly equitable, fair, and efficient healthcare system, that provides universal care at a lower cost. The Legislature must not fail to complete and install this enormous public good. Each of you on this committee now has the power to put Oregon on a path to meeting that obligation by moving SB 1089 forward.

Thank you.
