

Submitter: Rex Linford

On Behalf Of:

Committee: Joint Committee On Ways and Means

Measure: SB5506

I would like to point out that investing in Education is an investment of our future. I myself have made and will continue to make sacrifices that promote the education of students. My kids my grand kids or my students alike I have found this to be very profitable. I also think it would serve the state to consider this when looking at are future.
