

Submitter: Alexandra Bruckner
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: HB2279

I oppose HB 2279 and hope you will too. This makes Oregon a suicide destination place. It is bad enough that assisted suicide is legal in this state, but why not open the gates and invite the world to come here to end their lives? This is insane. Moving on from the moral objections I have to this bill, what will the financial implications be to the taxpayers. Will the deceased's insurance cover this? What about disposal of the body? What kind of drain on resources will this be to the state? I imagine our carbon footprint will increase with people coming here to die; it seems you value the planet more than the lives of people. Final thing: why is this deemed an emergency and why should we rush to implement this bill upon passage? It seems your priorities are not straight.

Vote no on HB 2279.
