

LIUNA! LOCAL 737

Feel the Power

Attached are letters of support for SB 594 from members of LIUNA Local 737. These letters of support are from members who work in various industries that LIUNA represents workers in, including demolition and related industries. The numerous signatures of support demonstrate the understanding of our members that SB 594 is an important policy change that benefits both workers and contractors in Oregon.

Ryan Nielsen
Political and Legislative Representative
Laborers International Union of North America (LIUNA) Local 737

LIUNA! LOCAL 737

Feel the Power

LIUNA! LOCAL 737

Feel the Power

I am writing to express my support for SB 594. As a member of LIUNA Local 737, I know firsthand the impact that good policy has on workers in the construction trades. Our craft has been one of—if not the most—affected by the carve out from prevailing wage for demolition and hazardous waste removal. I believe that all public works projects should pay workers fairly and allow us to support our families. SB 594 will help make this happen.

While businesses will benefit from a level playing field in public contracting, I want to highlight what SB 594 will do for construction craft laborers like me. SB 594 will:

- Create a steadier stream of opportunities for workers employed in demolition and hazardous waste removal industries, thereby giving us greater financial security
- Promote the continued creation and maintenance of a skilled and trained workforce by providing steadier opportunities in demolition and hazardous waste removal, especially through our apprenticeship programs
- Ensure that the dangerous work in these industries is fairly and equally compensated to area standard wages, regardless of what subsequent public works may or may not occur at that same site
- Ensure that public contracting agencies do not have the legal loophole to carve up projects to avoid prevailing wage requirements
- Remove the possibility for a section of the construction industry to be subject to substandard wages, where historically marginalized workers could be disproportionately impacted

I urge you to support me and my fellow workers by supporting SB 594.

Our craft has been one of—if not the most—affected by the carve out from prevailing wage for demolition and hazardous waste removal. I believe that all public works projects should pay workers fairly and allow us to support our families. SB 594 will help make this happen.

While businesses will benefit from a level playing field in public contracting, I want to highlight what SB 594 will do for construction craft laborers like me. SB 594 will:

- Create a steadier stream of opportunities for workers employed in demolition and hazardous waste removal industries, thereby giving us greater financial security
- Promote the continued creation and maintenance of a skilled and trained workforce by providing steadier opportunities in demolition and hazardous waste removal, especially through our apprenticeship programs
- Ensure that the dangerous work in these industries is fairly and equally compensated to area standard wages, regardless of what subsequent public works may or may not occur at that same site
- Ensure that public contracting agencies do not have the legal loophole to carve up projects to avoid prevailing wage requirements
- Remove the possibility for a section of the construction industry to be subject to substandard wages, where historically marginalized workers could be disproportionately impacted

I urge you to support me and my fellow workers by supporting SB 594.

LIUNA! LOCAL 737

Feel the Power

I am writing to express my support for SB 594. As a member of LIUNA Local 737, I know firsthand the impact that good policy has on workers in the construction trades. Our craft has been one of—if not the most—affected by the carve out from prevailing wage for demolition and hazardous waste removal. I believe that all public works projects should pay workers fairly and allow us to support our families. SB 594 will help make this happen.

While businesses will benefit from a level playing field in public contracting, I want to highlight what SB 594 will do for construction craft laborers like me. SB 594 will:

- Create a steadier stream of opportunities for workers employed in demolition and hazardous waste removal industries, thereby giving us greater financial security
- Promote the continued creation and maintenance of a skilled and trained workforce by providing steadier opportunities in demolition and hazardous waste removal, especially through our apprenticeship programs
- Ensure that the dangerous work in these industries is fairly and equally compensated to area standard wages, regardless of what subsequent public works may or may not occur at that same site
- Ensure that public contracting agencies do not have the legal loophole to carve up projects to avoid prevailing wage requirements
- Remove the possibility for a section of the construction industry to be subject to substandard wages, where historically marginalized workers could be disproportionately impacted

I urge you to support me and my fellow workers by supporting SB 594.

While businesses will benefit from a level playing field in public contracting, I want to highlight what SB 594 will do for construction craft laborers like me. SB 594 will:

- Create a steadier stream of opportunities for workers employed in demolition and hazardous waste removal industries, thereby giving us greater financial security
- Promote the continued creation and maintenance of a skilled and trained workforce by providing steadier opportunities in demolition and hazardous waste removal, especially through our apprenticeship programs
- Ensure that the dangerous work in these industries is fairly and equally compensated to area standard wages, regardless of what subsequent public works may or may not occur at that same site
- Ensure that public contracting agencies do not have the legal loophole to carve up projects to avoid prevailing wage requirements
- Remove the possibility for a section of the construction industry to be subject to substandard wages, where historically marginalized workers could be disproportionately impacted

I urge you to support me and my fellow workers by supporting SB 594.

Feel the Power

I am writing to express my support for SB 594. As a member of LIUNA Local 737, I know firsthand the impact that good policy has on workers in the construction trades. Our craft has been one of—if not the most—affected by the carve out from prevailing wage for demolition and hazardous waste removal. I believe that all public works projects should pay workers fairly and allow us to support our families. SB 594 will help make this happen.

While businesses will benefit from a level playing field in public contracting, I want to highlight what SB 594 will do for construction craft laborers like me. SB 594 will:

- Create a steadier stream of opportunities for workers employed in demolition and hazardous waste removal industries, thereby giving us greater financial security
- Promote the continued creation and maintenance of a skilled and trained workforce by providing steadier opportunities in demolition and hazardous waste removal, especially through our apprenticeship programs
- Ensure that the dangerous work in these industries is fairly and equally compensated to area standard wages, regardless of what subsequent public works may or may not occur at that same site
- Ensure that public contracting agencies do not have the legal loophole to carve up projects to avoid prevailing wage requirements
- Remove the possibility for a section of the construction industry to be subject to substandard wages, where historically marginalized workers could be disproportionately impacted

I urge you to support me and my fellow workers by supporting SB 594.
