

Submitter: Mark Brenden
On Behalf Of:
Committee: Senate Committee On Education
Measure: HB2753

As a school board member, taking funds from an already underfunded system is not sustainable. While the intent is great, our legislature and governor need to focus on sustainable funding for our K-12 schools. Currently, the legislature isn't even funding K-12 schools at the level necessary to provide every student with an opportunity to learn and grow. Part of being a volunteer, means that we as board members are not influenced in any way by compensation from the school district, and can make objective decisions with the student learning and growth at the forefront of every conversation. I'm a no on this proposed bill.
