

Submitter: Elizabeth Callison

On Behalf Of:

Committee: Senate Committee On Rules

Measure: SB1089

I am writing today to support SB 1089. As a nurse working for 41 years in intensive care and hospital administration, health care costs are out of control. The number of people putting off health care until they end up in the hospital for a preventable illness is staggering. We should be promoting preventative health care, educating people on how this saves money and time. SB 1089 is a means to Preventative Care. It is also going to be the way to stop the fraud, waste, and abuse that plagues the system now. I urge you to vote yes on SB 1089.

It is time for common sense in health related spending.
