

Submitter: David Krumbein
On Behalf Of: PLSO
Committee: Senate Committee On Natural Resources
Measure: HB3187

I have been a Certified Water Rights Examiner since 1987, During that time I have submitted somewhere over a Hundred Applications and Claims of Beneficial Use. Every project has required the use of the skills and Knowledge that I have because I am Registered Professional Land Surveyor. Whether its looking up deeds, searching for survey monuments, equipment being available, drafting skills. etc. All of these things are not things that are possible for a person to acquire on the job, it takes training and skill building. The present bill is too loosely written to require the necessary training and education that a person really needs to do the job correctly. Please feel free to call is you have any questions.
