

Submitter: Ssue Craig
On Behalf Of: Self
Committee: Senate Committee On Natural Resources
Measure: HB3464

Beavers provide huge benefits for storing alluvial water just as starters. They help our atmosphere, our other animals, our forests and wetlands with their ability to slow, and contain water. If they are considered predatory....they cut down trees, then our Forest Industry should have the same designation. Sorry, but we all need a bit of humor! We, as always....we humans, need to learn to live with other creatures, not destroy them. It might be hard to do, but there are many organizaions that would help to relocate beavers if they are a problem. Please pass this bill so we can save a lot of beavers, and get Fish and Wildlife to consider helping our beavers, instead of killing them. Thank you for the huge jub of work you are doing in our legislature.
Sue Craig.
