

Submitter: Lacey Landecho

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: SB628

My son started having major symptoms in February 2020 and the symptoms got so bad that he couldn't go to school or even retain information learned for 2 years. He was diagnosed in March 2021 and started treatment but it took over a year of treatments with antibiotics for him to be able to return to school. He was doing so well and catching up so fast but got another infection and now he is in another flare and the antibiotics are making his so sick that he is unable to go to school again but this time due to physical sickness from the antibiotics. If our insurance covered IVIG he could be cured. Please approve this measure so my son can have IVIG covered by his insurance and be cured of this horrible disease.
