

Submitter: Sandra Herrera
On Behalf Of: Myself
Committee: Senate Committee On Health Care
Measure: HB2996

Without proper training X-rays can be harmful. There are different amount of exposure needed for younger kids and older grownups with less bone density. To have a person with no training perform this task is too dangerous.

I am still paying for my training after 4 years. If you pass this bill my pay rate will go down and I will have college debt for longer. Please oppose this bill.
