

Please vote no on HB3501!

This legislation is harmful to everyone and further destabilizes the state of Oregon. This will in no way help people move past homelessness and just further entrench people into their current situations and bring the rest of the state down with them.

It also bypasses the rights of people that are not homeless as it removes our right to enjoy the use of public lands. It's ok to be compassionate and help people rise out of their current situations. It isn't ok to just lower the standard and bring everyone else down to them.

The proper legislation is one that brings in safety, opportunity for all and not just a select demographic.
