

Submitter: Chantal Wikstrom

On Behalf Of:

Committee: House Committee On Housing and Homelessness

Measure: HB3501

This bill would significantly increase degradation to human public health and our natural and built environment. This bill does not directly impact the contributing factors to homelessness and is a waste of taxpayer money and is not sustainable. This bill would heavily impact the local economy, driver and pedestrian safety, safety of those who are houseless and would increase pests, viruses and other disease pathways. I oppose this bill and I urge you to oppose it as well.
