

Support for Senate Bill 628
PANDAS/PANS Medical Providers

I support Senate Bill 628 as a PANDAS/PANS provider who has seen firsthand the devastating medical consequences that delayed medical care can cause for these children. We need to ensure all Oregon children can access the treatment deemed necessary by their treating medical provider, including IVIG when indicated. The State of Oregon has already approved IVIG coverage for children on Medicaid and Senate Bill 628 will ensure pay parity with commercial and private insurers to do the same. I support Senate Bill 628 and as a medical provider treating this population, would urge you to consider the experiences and expertise of those treating this population instead of those without.
Thank you.

James Hancey, MD
