

Submitter: Tony Fischer
On Behalf Of: Family Spokesman for 10 People
Committee: Senate Committee On Rules
Measure: SJR33

We live in changing times and are more enlightened about DNA, social issues, individual rights, etc., etc. than ever before. Our awareness and understanding about our own "humanity" has increased. It is time we recognized and validated our own complexity, In fact it is something to celebrate, not hide.. Furthermore, this bill appropriately puts the issue before the voters and our legislature will be respected for that referral.

Thank you.
