

I am writing to appeal to you to vote against the attached bill that is currently in committee. Any progress we have made, (if there is any), in alleviating the camping situation would be defeated by passage of this bill or any ordinance similar. It's actually incredibly audacious to consider it. I am a resident of district 38 both in my residence and place of business. We moved our office here to flee the city of Portland after 38 years. This bill would allow our entire state to follow the same downward and likely irreversible spiral the COP finds itself in now. If you read this and you could shed any light on what the motivation or thought process is on this proposed law, I would love to hear it. I have emailed the sponsors without reply.
