"HB 3055 A STAFF MEASURE SUMMARY
Senate Committee on Energy and Environment"

<https://olis.oregonlegislature.gov/liz/2023R1/Downloads/CommitteeMeetingDocument/271538>

[HB 3055A] raises significant questions:

"Why should the PGE be compelled to subsidize third-party energy producers and pass these costs to customers?"

"Will precious, irreplaceable farmlands be converted to solar and wind farms?"

"Will residential users be compelled to enter into power agreements with expensive community solar projects?"

I will take PGE's power purchases over third-party energy producers' compelled subsidies and correspondingly higher rates any day.

David S. Wall
Mr. Oregon Concur.
